DETAILED ACTION

Response to Amendment

1. The amendment filed August 7, 2006 has been entered and claim 19 has been cancelled.

Drawings

2. The objection to the drawings is withdrawn in light of the amendment of page 13, lines 17 and 19 of the specification

Allowable Subject Matter

3. Claims 13, 16-18 and 20 are allowed.
4. The following is an examiner's statement of reasons for allowance: The prior art fails to disclose a method of manufacturing an integrated semiconductor device comprising the steps of: implanting impurities concurrently into a first drift layer of one semiconductor element and into a second drift layer of another semiconductor element, an implantation mask being used that includes a portion corresponding to said first drift layer of said one semiconductor element and having a first opening ratio as well as a portion corresponding to said second drift layer of said another semiconductor element and having a second opening ratio different from said first opening ratio; wherein said implantation mask being used has said first opening ratio smaller than said second opening ratio. The above limitations in combination with other claim limitations are not taught or fairly suggested by the prior art nor would it be obvious to modify the references of record so as to yield the method of manufacturing an integrated semiconductor device of the instant application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
